# Saikrishna Jagannath Shenoy

C: +1 (864) 765-6590 | saikrishnajshenoy@gmail.com | linkedin.com/in/saikrishnashenoy/ | Available for full-time Dec 2026 onwards | Cental, South Carolina

## EDUCATION

**Master of Science in Mechanical Engineering**, *Clemson University, Clemson, SC* ***December 2026***

Design Methodologies | Engineering Optimization | Manufacturing Processes and Process Development | Composite Manufacturing Processes

**Bachelor of Technology in Mechanical Engineering**, *PES University, Bangalore, India* ***May 2022***

Vehicle Dynamics | Automotive Engineering | CAD Modelling | Programming for Modeling |

## TOOLS and SKILLS

CAD & CAE Software, Product Design and Development, Prototyping and Testing, SolidWorks, MATLAB, Siemens Tecnomatix, Moldex3D, 3D Printing, Design for Manufacturing, Quality Process, Team Player, Innovative

## EXPERIENCE

**Hachidori Robotics Pvt Ltd**, *Mechanical Design Engineer, Bangalore, India* *Apr 2024 – Jun 2024*

- Worked alongside the sales team delivering bespoke Automatic Guided Vehicle (AGV) solution concepts to prospective customers
- Designed a prototype Automated Storage and Retrieval System (ASRS) AGV concept using SolidWorks
- Liaised with customers to establish deliverables and develop solutions

**Delta X Automotive Pvt Ltd**, *Mechanical Design Engineer, Bangalore, India* *Jan 2022 - Jul 2023*

- Mechanical designer entrusted with end-to-end design and testing of a micromobility EV scooter
- Lead role for the design of the rear suspension system and welding fixture assemblies
- Utilized DFM/DFA principles to design the rear suspension system to ensure ride comfort and durability
- Developed a welding fixture for the chassis structure and suspension components
- Listed as a Co-Designer of the vehicle chassis (**Indian patent no.202341001905**)
- Drafted a standard operating procedure (SOP) for welding processes to improve consistency and quality in assembly production
- Collaborated with vendors to ensure timely and cost-effective procurement and manufacturing of components

**Hachidori Robotics Pvt Ltd**, *Mechanical Engineering Intern, Bangalore, India* *Sept 2021 – Dec 2021*

- Design and CAD modeling (SolidWorks) of components for an AGV
- Developed a housing solution for sensors to improve accuracy and efficiency in warehouse environments

## ACADEMIC PROJECTS

**Master's Thesis**, *Clemson, South Carolina* *Jan 2025 – May 2026*

- Studying the conceptual design process, focusing on design ideation and curiosity, to promote design space exploration
- Statistical analysis of survey results emphasizes the link between the designer's epistemic curiosity and concept generation tendencies
- Presented findings as a Technical Presentation at ASME IDETC 2026 (DTM 05-02)

**Vehicle Testing and Characterization**, *Teaching Assistant, Clemson, South Carolina* *Aug 2025 – Dec 2026*

- Tasked with creating laboratory coursework for the Vehicle Testing and Characterization course at Clemson's Automotive department
- Gained hands-on experience using DAQ systems to gather and understand digital signal processing

**VARTM Fabrication of a Miniaturized 2024 Audi RS6 Hood**, Clemson University, *Clemson, South Carolina* *Aug 2025 – Dec 2025*

- Hands-on fabrication using the Vacuum-Assisted Resin Transfer Molding (VARTM) process for carbon fiber hood
- Moldex3D was used to simulate the entire process to predict front flow, estimate filling time and detect potential air gaps and defects
- Tool was designed using SolidWorks and 3D printed using PETG

**Material Selection for Control Arm of Suspension System**, Clemson University, *Clemson, South Carolina* *Jan 2025 – May 2025*

- Screened four material candidates for a generic suspension control using Ashby charts to meet loading, stiffness, and deflection requirements
- Recommended Al A357 as the performance choice and ASTM A588 as the cost-effective choice for suspension systems

**Design of Control Arm of Suspension System for Casting**, Clemson University, *Clemson, South Carolina* *Jan 2025 – May 2025*

- Control arm modeled using SolidWorks and optimized post analysis to meet set constraints
- Casting simulated using Solid Cast and machining simulated using SolidWorks CAM

**Manufacturing Plant Optimization**, Clemson University, *Clemson, South Carolina* *Sept 2024 – Dec 2024*

- Modeled production workflow (Siemens Tecnomatix) to meet an annual 70000 engine unit target using Lean Manufacturing principles
- Robust plant setups that account for realistic constraints such as staffing, worker efficiency and machine failure rates
- Implemented sensor-driven optimization, reducing staffing requirements while improving material flow and cycle time

**Team Vega Racing Electric-** *Vehicle Dynamics Lead,* PES University, *Bangalore, India* *Feb 2020 – July 2022*

- Led the Vehicle Dynamics Domain and collaborated with other domains to integrate components into the race car
- Designed front suspension system using Lotus Suspension Software and CAD modeling tools
- Participated in Formula Green 2021 and came in 2nd place in the design competition

**Capstone Project on FSAE Vehicle**, PES University, *Bangalore, India*, *Jan 2021 – Nov 2021*

- Designed an indigenous fixed-length adjustable damper for a FSAE vehicle
- Modeled the damper functionality using MATLAB and verified using ANSYS CFD software

## CERTIFICATES

**SolidWorks CAD Design Associate (CSWA)**
